Pedro Semeano

Full-stack web developer

Personal info

Location	Lagos, Portugal
Sex	Male
Date of birth	22/02/1984
Nationality	Portuguese

Work experience

January 2015 - present

Freelancer

MyiArts - http://www.myiarts.com
A social network and an art marketplace for artists and enthusiasts. I was responsible for the application development and connection to their backend via API.

- AngularJS
- LoDash
- Gulp

Hightide - http://hightide.io

A booking management tool to organize your bookings. I developed the entire application and also took part in decision-making in the UI/UX.

- AngularJS
- Firebase
- LoDash
- jQuery
- SASS

Instalab - http://www.insta-lab.com

Instagram photo printing services. Developed the entire site from scratch, front-end and back-end.
- jQuery
- HTML/CSS
- PHP
- MySQL
- Instagram API
- Paypal payments

Landing Jobs - https://www.landing.jobs

Tech jobs referral company. Responsible for the Ghost-based blog platform, theme customisation and adding new features.
- Javascript
- NodeJS
- CSS3
- Handlebars

April to October 2015

Group Travel Technologies

GroupMinder - http://grouptraveltech.com

Development of the web-based booking software application for travel agencies.
- Coldfusion
- jQuery
- CSS
- Bash

January 2010 to April 2016

Sinfic S.A.

Quatenus - Global Tracking Interface - http://quatenus.eu

Development of a portal for tracking assets (cars, trucks, motorcycles, people, ...) where you could manage your fleet or team and have total control over them and the costs of your company.
- ASP.NET
- C#
- jQuery
- HTML5
- CSS3

Quatenus - Track Edition

Responsible for the full development of a new edition of the main product, meant for the general public. Made using responsive design, simple and clean look, and a very intuitive usage.

- ASP.NET
- C#
- jQuery
- HTML5
- CSS3
- Google Maps

2008 to 2009

Tutor at Faculty of Cience and Technology

Responsible for the laboratory classes of two modules: Digital Logic Systems and Sensory Perception.

**Education and training
2005 to 2010**

Masters Degree in Electrical and Computer Engineering at Faculty of Cience and Technology

Masters thesis based on the development of an access control application to be installed in the premises of the National Security Office in Portugal.

Skills

Javascript	AngularJS	LoDash	jQuery	PHP

3rd place on the Microsoft Imagine Cup 2005 challenge

Innovation Award with HLP project (Handicap Language Provider)

References

Ricardo Farinha
Colleague at FCT, Team Member at Microsoft Imagine Cup and LenaBusiness contests

Pedro has proven to be an exceptional software engineer, extremely innovative, very adaptable and pro-active. With Pedro's relentless motivation and his software engineering knowledge I strongly believe he would be an excellent fit to any organization.

Vitorino Ribeiro
Team Leader at Quatenus

Good logical thinking skills, to learn new concepts and good ability to lead complex projects to fruition.

Pedro Oliveira
Founder at Landing Jobs

I definitely vouch for Pedro. This guy is a doer and get sh*t done. If you're considering hiring Pedro for freelancing gigs or contract-based roles, definitely ring him a bell! I know I will.
